Cloud Computing

Assignment 2 – Public Cloud

- **Overview**
  In this assignment, you will design and deploy a **Product Catalogue application** on Public Cloud.

(a) Data Layer (2 marks)
You must use a **database or storage service**

(b) Web Application (4 marks)
- Your application must:
  i. Add new products
  ii. List all products
  iii. Must handle invalid inputs gracefully
  iv. Publicly accessible URL

(c) Feature Integration (4 marks)
- You must add **two features** from the public cloud

(d) Architecture & Documentation (2 marks)
- Submit a PDF containing:
  i. Features added and why they are useful for this application
  ii. Architecture decisions
  iii. Architecture diagram
  iv. Public URL

- Submit the document in Moodle along with the source code.
- Due: March 9th, 2026
- Marks: 12

- You can use any Public Cloud
  - If you plan to use Microsoft Azure you can get a free student account that does not need a Credit Card: https://azure.microsoft.com/en-in/free/students
  - If you plan to use Google Cloud Platform (GCP) I have free education credits. Send me an email.

- Try to keep the cost low:
  - Delete unused resources
  - If the WebApp has significant cost – you can only have it running when the TAs are grading.
